## Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/31/07 has been entered.

## Allowable Subject Matter

- Claims 1-8 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

Regarding *amended* claim **1**, Livermore et al. (U.S. 6,542,511) (hereinafter "Livermore") teaches the fully meshed network (network system) shown in Figure 4 that interconnects nodes 12 (packet-switching network elements) as spoken of on column 6, lines 5-9.

Livermore also teaches the node controllers 44 (nodes) located within nodes 12 as shown in Figure 8 that control a common pool of network capacity through links among the nodes 12 whose capacities are dynamically adjustable (variable capacity) as spoken of on column 3, lines 37-40 and column 8, lines 41-46.

Livermore also teaches the paths (connections) of variable capacity for each node pair (source/destination nodes) that carry multiple classes of traffic (traffic load) as spoken of on column 3, lines 4-9.

Application/Control Number:

09/938,014

Art Unit: 2619

Livermore also teaches the control of the QoS and end-to-end capacity allocation by the source and destination nodes based on the traffic distribution among the end nodes as spoken of on column 3, lines 50-62, as well as column 8, lines 54-58.

Livermore as well as the other prior art of record fail to teach "the capacity of each connection controlled <u>directly and exclusively from its destination node</u> based at least in part on the traffic loads associated with the connections configured to transport data to that destination node" in combination with the other limitations of claim 1.

Regarding claims **2-8**, these claims are further limiting to *amended* claim **1** and are thus also allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
